Air CONDITIONING

FOR LIGHT, MEDIUM AND HEAVY TRUCKS FOR TRUCKS WITH AUTOMATIC TRANSMISSIONS

FEATURES OF CHEVROLET TRUCK AIR CONDITIONING

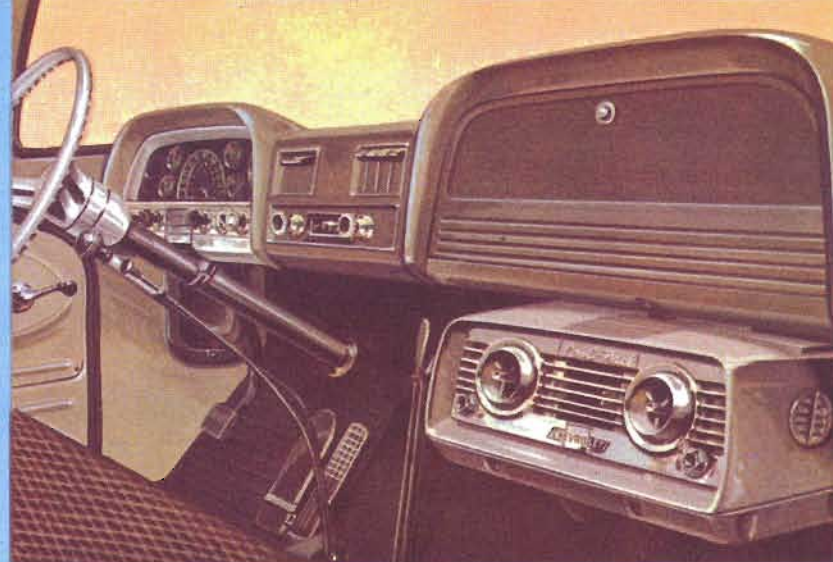

- ENGINEERED TO MATCH CHEVROLET TRUCK ENGINE ECONOMY, GASOLINE MILEAGE AND ENGINE EFFICIENCY.
- REMOVES UP TO ONE AND ONE QUARTER GALLONS OF MOISTURE FROM THE AIR AN HOUR.
- REMOVES DUST AND POLLEN FROM THE AIR IN THE CAB AND RECIRCULATES IT ONCE EVERY MINUTE.
- COOLING CAPACITY EQUAL TO 2800 POUNDS (1.4 TONS) OF ICE PER DAY.
- COOLS EFFICIENTLY IN SLOW CITY TRAFFIC AND HIGHWAY DRIVING SPEEDS.
- REQUIRES VIRTUALLY NO ADDITIONAL LABOR WHEN SERVICING THE ENGINE OF THE TRUCK.

CONDENSER DEHYDRATOR All steel tubing for strength. Twin pass tubes for fast heat dissipation. High moisture absorption dehydrator with built-in sight glass.

COMPRESSOR AND CLUTCH A six cylinder axial Frigidaire compressor with needle bearings and an electro-magnetic clutch. The compressor is completely field serviceable.

FOR HEAVY DUTY TRUCKS EQUIPPED WITH GEAR SHIFT IN FLOOR OF CAB

A highly efficient air conditioner custom designed for installation on all light and medium model Chevrolet trucks with automatic or steering column shift transmissions. The evaporator unit is suspended from the lower edge, and in the center of the instrument panel. This type of installation requires only a minimum amount of space in the cab and assures ample leg room and space for other optional equipment. Can be installed on trucks with or without a heater and defroster.

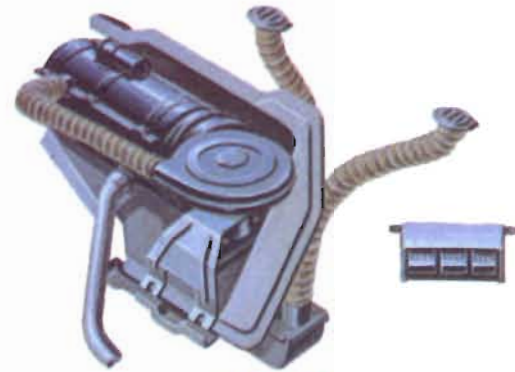

THERMOSTATIC CONTROL A gas filled capillary tube highly sensitive to heat and cold that cycles the compressor. The control is adjustable and can be set to cycle compressor as required for best operation.

This unit has been designed for installation on the medium, heavy and heavy duty trucks with four or five speed transmissions. The compressor and condenser are installed in the engine compartment. The evaporator unit is suspended from the lower edge and to extreme right of the instrument panel. This type installation does not interfere with the shifting of gears or optional equipment that may be required on heavy duty trucks. The air conditioning installation can be made with a heater and defroster.
