

If you want a spare tire for your Greenbrier that will allow clearance for a hinged engine lid, you may want to try a size 165/70 R14. I use a Kumho Power Star 75B tire and have about 1/4" clearance at the closest position. I haven't tried mounting it with the stock tire/jack assembly (don't have one), but since the tire fits a standard rim, I assume it should work. I ordered the tire on-line from tires-easy.com .
