

CORVAN ANTICS TECHNICAL INDEX 1972-1996

CORVANATICS
THE FORWARD CONTROL CORVAIR PEOPLE

PUBLISHED NOVEMBER 1996

PREFACE

At last, a new updated Technical Index is done. It, unlike its predecessor, done in 1988 by Bob Terkelson, is not on a computer diskette, or any other memory retaining device. It was produced one finger at a time on my newly acquired Word Processor. You can tell, I am 30 years behind the times, as are my vehicles.

This index is generally organized like the 1961 CORVAIR & CORVAIR 95 SHOP MANUAL with an added Section 13 for what doesn't fit elsewhere. Most of you use the shop manual, so the index should be easy to use.

CORVAN ANTICS was originally published monthly, then quarterly, and finally became bimonthly with little lapses along the way. All technical articles are identified by a volume and number, date (Sp, Su, Fa, and Wi prefixes for spring, summer, fall, and winter quarterlies.) Bimonthly issues dated with 1st month of the date and page number.

I know this index is not perfect, but it will give you a good idea of what is contained in past issues of CORVAN ANTICS.

Besides all the tech articles, there are many articles of owners experiences. It should make for many hours of interesting reading. If you have done something special or have fixed a particular problem not covered here, write an article on it and send it to your Tech Editor to share it with others. This is what it is all about.
